

A histogram showing the distribution of CDR3 lengths for various antibody groups. The x-axis is labeled 'CDR3 length' and ranges from 0 to 80. The y-axis represents frequency. The distribution is primarily centered around a length of 25-30. Several groups are highlighted with colored bars: a tall red bar at length 25, a yellow bar at length 28, an orange bar at length 29, a blue bar at length 26, a green bar at length 27, a purple bar at length 24, and a single orange bar at length 58. A grey histogram shows the overall distribution of all groups.
